### BKS locking cylinder series according to DIN EN 1303 and DIN 18252

5 or 6 pin profiled cylinder for **registered differ, keyed alike locking and suited applications, with security card,** with additional side bar locking and 4 sprung locking elements within cylinder body. Brass cylinder body nickel plated, satin bronzed, dark browned or polished brass, with 3 keys, with M5 x 80 mm nickel plated steel fixing screw, without escutcheons.
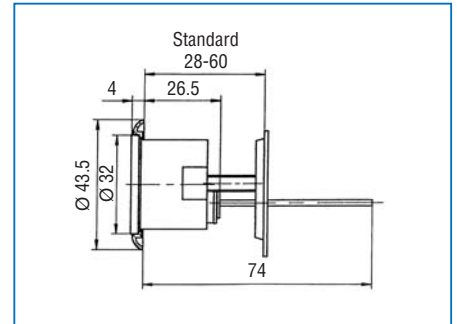

Overview of cylinder variants
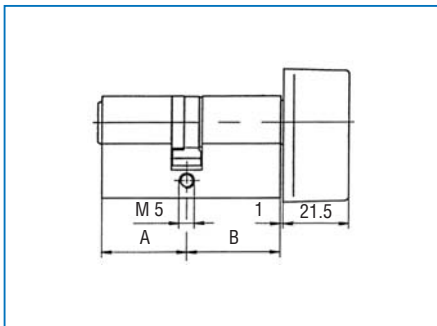

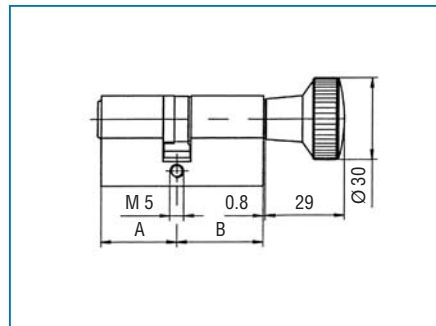

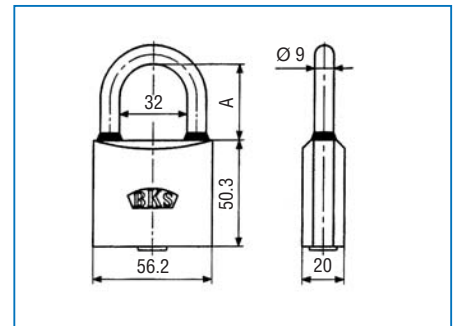

Double cylinder 3300
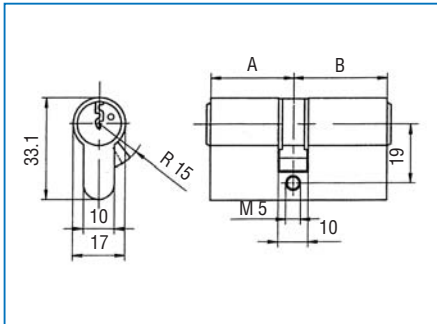

Half cylinder 3301
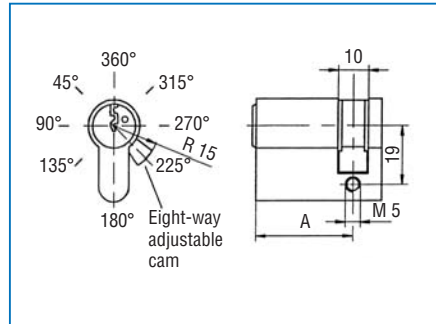

Rim cylinder 3319

Knob cylinder 3304

Knob cylinder 3306

Brass padlock 3328

Other versions e.g. cam cylinder, rim locks and special cylinders are available.

Options and advice:

Emergency function	Optional from BL 31/31 on both sides, from BL 27/31 on one side. The emergency function on double cylinders allows the cylinder to be operated even if a key is inserted on the other side of the cylinder.
Drill protection	Available as an option: certificated drill protection versions BSKA (two pairs of electro-plated hardened steel pins on each side of cylinder) and BSKB (outside A with two pairs of electro-plated hardened steel pins and two hard metal drill protection pins each in plug and body).
Drill and withdrawal protection	Protection against cylinder plug being withdrawn (BZKB). Outside plug and outside of cylinder body with hardened steel anti-drill pins and body security pin to secure a broken cylinder behind the backplate of the security furniture (optional).
VdS approval	Double, half and knob cylinders with VdS certification available on request. (VdS = Association of German property insurers)
SKG approval	Double, half and knob cylinders with SKG and SKG certification available on request.

Combinations with cylinder series 31 possible.

Mounted and pre-mounted cylinders with customer specific profiles available.
